PRELIMINARY AMENDMENT
SUBMISSION OF SUBSTITUTE FORMAL DRAWING
CLEAN COPY OF WRITTEN DESCRIPTION
(under 37 CFR 1.121)

Sir;

This paper is submitted as a Preliminary Amendment
to the above identified recently filed application.
Please amend this application as follows:

IN THE TITLE:

Page 1, line 1, DELETE "AND METHOD OF CONSTRUCTION"

IN THE DETAILED DESCRIPTION:

Page 8, line 32, add the following single paragraph concerning lancet device Claims 24-30.

MICROLANCET DEVICE - FIG.s 3A 3B and 3C

Disposable microlancet device 30i (see FIG. 3A) may be employed for obtaining a blood sample through the skin

of a subject. The device is formed by an elongated single crystal silicon substrate 32a having base end 30b and penetration end 30p. Base portion 32b formed at the base end of the silicon substrate permits the device to be retained during penetration and sampling. Penetration portion 32p formed at the penetration end terminates in a sharp point with smooth continuous cutting profile. The smooth profile permits easy piercing and penetration of the skin in order to obtain a blood sample while inflicting minimum pain on the subject. The penetration portion has a thickness cross-section dimension "T" (see FIG.s 3B and 3C) and a width cross-section dimension "W" (see FIG.s 3A and 3C). The cross-section may be any suitable shape such as rhombic or rectangular as shown in FIG. 3C. The thickness dimension T of the base portion may extend from about 50 micrometers to about 250 micrometers excluding the sharp point. The width dimension W of the base portion may extend from about 50 micrometers to about 250 micrometers excluding the point. At least one of these dimensions may taper toward the penetration end to form the sharp point (see FIG. 3A). The silicon substrate may have a length dimension "L" (see FIG. 3B) of from about 1 millimeter to about 3 millimeters. Silicon nitride film 34 may extend over at least part of the base portion.

IN THE FIGURES

Replace original Figures 1A-1I (one sheet of drawing) with replacement Figures 1A-1I (one sheet of drawing). Replace original Figure 2 (one sheet of drawing) with replacement Figure 2 (one sheet of drawing). Add new Figures 3A-3C (one sheet of drawing) showing the lancet device. The above changes to the figures are noted in the accompanying Draftsperson's Letter.
